PROFESSIONAL SUMMARY

Full Stack Developer and Software Development Engineer (B.Tech [🔗](#) CSE, 2023-2027) with a combined 7+ months of professional experience across two internships. Currently a Software Development Engineer Intern at Codeinbound LLP and a Data Engineering Intern (ongoing) at Celebal Technologies; open to full-time and internship Software Development Engineer, Full Stack Developer, DevOps Engineer, and Cloud Engineer opportunities. At Codeinbound, root-caused and resolved a critical concurrency bug silently breaking real-time data delivery in an enterprise dashboard. Skilled across React, TypeScript, Node.js, and FastAPI, with cloud deployment experience on GCP and a strong foundation in Data Structures, Algorithms, and OOP. GCP Legend Tier certified; led a 10-member team to ship a full-stack platform in 3 months.

SKILLS

Programming Languages: Java, Python, C, JavaScript, TypeScript

Frontend Development: React.js, Vue.js, HTML5, CSS3, Responsive Web Design, RESTful API Integration, Cross Browser Compatibility, TypeScript, Redux, Agile/Scrum, Jest, Unit Testing

Backend Development: FastAPI, Node.js, Express.js, REST API Integration

Databases: MongoDB, SQL, PostgreSQL

Cloud and DevOps Tools: Docker, Google Cloud Platform, Git, GitHub, GitHub Actions, CI/CD, Vercel

Core Computer Science Concepts: Data Structures, Algorithms, Object Oriented Programming, Software Development Lifecycle

EXPERIENCE

Code Inbound LLP [🔗](#), *Software Development Engineer Intern*

2025/12 – 2026/06

Remote

- Restored real-time data consistency in an enterprise dashboard's export pipeline by root-causing and resolving a production concurrency bug (stale-closure race condition in a TypeScript Higher-Order Component) that had been silently breaking WebSocket subscriptions.
- Eliminated 30+ recurring state-management and rendering defects across 10+ modules, and improved rendering performance across 25+ React components via browser dev-tools profiling.
- Strengthened release reliability by collaborating with cross-functional engineering teams in an Agile/Scrum workflow to ship production ready fixes using Git version control.

Celebal Technologies (Celebal Excellence Internship) [🔗](#), *Data Engineering Intern*

2026/06 – 2026/08

Remote

- Improved data quality for downstream sales analysis by building ETL and transformation pipelines in Python, Pandas, and NumPy to clean and feature-engineer retail sales data.
- Enabled data-driven decision-making by performing EDA and SQL-based sales metric computation in Jupyter Notebook and SQLite.

Sphuri Sports Fest 2026(DIT University) [🔗](#), *Technical Team Head*

2026/01 – 2026/03

Dehradun, India

- Delivered a full-stack sports management platform within a 3-month timeline by leading a 10-member software development team through design, build, and deployment, directing Agile sprint planning and code reviews.
- Enabled real-time engagement for event attendees by building live score updates, event registration workflows, and dynamic data systems using React.js, Node.js, MongoDB, and REST APIs.

PROJECTS

AI Resume Analyzer & ATS Optimizer [🔗](#), *React 18, TypeScript, FastAPI, PostgreSQL, GitHub Actions*

- Built an AI-powered resume analyzer with ATS scoring, resume parsing, and JD matching.
- Implemented JWT authentication and skill-gap analysis, reducing manual screening effort by ~80%.
- Deployed using Docker, GitHub Actions CI/CD, and GCP Cloud Run.

- Link:** <https://ai-resume-analyzer-omega-ruddy.vercel.app/> [🔗](#)

FlowMate: AI-Powered Team Productivity Platform, *React18, Node.js, Express.js, MongoDB Atlas, Firebase Auth, Docker, Gemini API*

- Designed and built a Node.js/Express backend with Mongoose data models, Firebase Auth middleware, and a cron-based reminder job scheduler for automated deadline-risk alerts.
- Integrated the Google Gemini API for AI-driven subtask generation and calendar time-blocking; containerized the stack with Docker and deployed to Google Cloud Run.

CERTIFICATIONS

Google Cloud Arcade Program [🔗](#), *Legend Tier Achiever*

Linux Fundamentals [🔗](#)

Database Management Essentials [🔗](#)

Introduction to Java [🔗](#)

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering, *DIT University* [🔗](#)

2023 – 2027

Specialization in Full Stack Development and DevOps **CGPA: 7.12**

Dehradun, India
